## 5 Ways to Cope with Pandemic Re-entry Anxiety

With the COVID-19 vaccine becoming much more widely available across the country, the topic of returning to in-person work, school and other activities is being discussed constantly. However, the country's reopening coincides with the spread of the Delta variant of the coronavirus, which accounts for [more than half of all COVID-19 cases](#) in recent weeks. Returning to pre-COVID life amid this latest development can understandably cause feelings of uncertainty or re-entry anxiety.

### What Is Re-entry Anxiety?

Re-entry anxiety is an overall uneasiness or uncertainty about returning to the way things were before the pandemic. This feeling may be triggered when meeting socially with friends and family, going back to the workplace or pursuing other important aspects of social interaction. It might be difficult to get reacclimated, but it's important to remember that you're not alone.

**51 per cent** of Canadians feel nervous about resuming normal activities post-pandemic, according to an Ipsos poll.

## Managing Your Re-entry Anxiety

Different people have different coping strategies, but there are some common ways everyone can cope with re-entry anxiety. If you're feeling anxious as you transition back to your pre-COVID-19 life, consider the following five coping tips:

1. **Start small** and gradually build up to more significant social interactions. Don't rush into anything.
2. **Set boundaries** by letting other people know what you're comfortable with. There's no need to apologize for not wanting to do something, so clearly explain how you feel and also be respectful of others.
3. **Do what makes you happy**, even if only for a few minutes each day. It's important to engage in something fulfilling for yourself regularly.
4. **Take care of yourself** and set aside time every day to relax and reset your mind.

Re-entry anxiety can be alleviated when managed in a healthy way. If you're worried about your mental well-being, reach out to a doctor or mental health professional to ensure that you're getting the help you need as you make a return to everyday life.

## Marvellous Muffins

## Cholesterol and You

Did you know nearly half of Canadians struggle with high cholesterol? Cholesterol is a waxy substance found in your blood. Your body needs it to build cells, but too much can pose a problem. Cholesterol travels through the blood on proteins called lipoproteins. There are two types of lipoproteins:

1. LDL (low-density lipoprotein)—known as **bad cholesterol**—makes up most of your body's cholesterol. High levels of LDL cholesterol can increase your risk for heart disease and stroke.
2. HDL (high-density lipoprotein)—known as **good cholesterol**—absorbs cholesterol and carries it back to the liver to be flushed from the body.

Bad cholesterol can be elevated by certain factors, including obesity, physical inactivity, unhealthy diet, smoking, excessive alcohol use and family history. High cholesterol usually has no symptoms, so it's best to have a cholesterol screening every four to six years and discuss lifestyle risks with a doctor.

## Breathing Exercises for Anxiety

When anxious, you tend to take rapid, shallow breaths from the chest. Chest breathing can result in increased heart rate, dizziness and muscle tension. During abdominal or diaphragmatic breathing, you instead take even deep breaths, which reduces the amount of work your body needs to do to breathe.

If you're feeling breathless because of anxiety, try the following techniques to alleviate symptoms:

- Equal breathing—From a sitting or lying-down position, inhale for the same amount of time as you're exhaling. Try using a four-second count.
- Mindful breathing—Focus on your breathing and bringing your mind's attention to the present. Don't let your mind drift to any concerns.
- Slow breathing—You normally take 10 to 20 breaths per minute, so strive to take four to 10 breaths per minute.
- Resonant breathing—Lie down and close your eyes. Gently breathe in through your nose for six seconds and exhale for six seconds.

If these types of breathing feel challenging, try again in a day or so, or build up the time gradually. If your anxiety persists or gets worse, contact your doctor.

Makes: 12 servings

### Ingredients

60 mL canola oil  
150 mL packed brown sugar  
1 egg  
1 very ripe banana, mashed  
1 zucchini, grated (about 250 mL)  
5 mL ground cinnamon  
125 mL 0% fat plain Greet yogourt  
5 mL vanilla extract  
250 mL all-purpose flour  
175 mL wheat bran  
60 mL wheat germ  
5 mL baking powder  
2 mL baking soda  
125 mL raisins, dried cranberries or dried blueberries

### Preparations

- 1) Preheat oven to 200 C.
- 2) Line 12 muffin tins with paper liners.
- 3) In a large mixing bowl, whisk together oil, sugar and egg.
- 4) Add banana, zucchini and cinnamon. Stir in yogourt and vanilla.
- 5) In another bowl whisk together flour, wheat bran and germ, baking powder and soda.
- 6) Add flour to the banana mixture and stir until just moistened.
- 7) Stir in your choice of raisins, dried cranberries or dried blueberries.
- 8) Divide the muffin batter among the prepared pan.
- 9) Bake for about 18 minutes or until light golden and firm to the touch.
- 10) Let cool slightly before enjoying.
